

The OSHA Safety Professionals

"We have been serving organizations nationwide to improve their safety programs and reduce risk for 25 years."

– Steven Brooks, President SafetyNet Inc.

PROFESSIONAL LAYERED SAFETY AUDITS

"OUR TEAM WILL "LOOK UNDER THE HOOD" OF YOUR EHS PROGRAM TO IDENTIFY CORE ISSUES THAT CAN IMPROVE COMPLIANCE, ELIMINATE HAZARDS & REDUCE RISK."

**– Steven Brooks, President
SafetyNet Inc.**

SafetyNet offers layered OSHA safety audits to fit the industry-specific EHS requirements of your organization. We offer three different levels to suit your company's needs. Our Layer 1 physical audit identifies and prioritizes common OSHA violations, while the Layer 2 Audit digs deeper into your safety program to uncover high-risk gaps and deficiencies that could put your company and workers at risk.

Our Layer 3 audit goes even further by training your managing staff once the audit is complete on how to recognize, correct, control, and manage safety and risk with the intent of minimizing or eliminating hazardous issues and at-risk behaviors. Our course will provide the skills necessary for management to proactively recognize hazards and prevent unforeseen accidents from occurring. Layer 2 and Layer 3 audits empower your organization with "hazard correction tracking" through our cloud-based Axis-Hub safety management platform to monitor progress and verify results.

Major Benefits of a layered audits include:

- ✓ Identify safety program gaps before they lead to unforeseen accidents or injuries
- ✓ Improve your program with industry wide professional knowledge and experience
- ✓ Reduce the risk of costly OSHA violations
- ✓ Improve your managements' knowledge and skills of Proactive Safety Management
- ✓ Develop an easy-to-follow plan for safety program improvement
- ✓ Track and verify the results of your investment and "Get Results"
- ✓ Improve workforce safety culture by knowing their safety is a priority!
